Now-a-days, it's All. About. Me.
All about what I can get,
All about what I can achieve.
I am the only one who can reach my dreams,
Therefore, it only matters what I think or feel.
I mean, you aren't going to check for my needs.
You told me to work as a team,
Then turned around and told me to strive for what's important to me.
And that is to be on top
So I'll spend my time making sure I never drop.
I'll work with a team, but I don't guarantee
That anyone will be on my mind except for, well, me.
There may be no ‘I’ in team,
But I am right at the center of WIN.
And seeing that 'U' are nowhere in there
Don't even think I'll let you in.

Sound familiar to you? Because it sure does to me.
So many of us subconsciously make the same speech daily.
We've become so obsessed with ourselves
That we've taken the liberty of putting Christ on a shelf.
And by straining to see in darkness without the Light of Life
We have developed I problems and are all walking blind.
We can't see the Son so we feel our way around
And it seems to be working 'til you end up on the ground.
Then, in an attempt to replace the optic nerve
We put on special glasses which ultimately only serve
To transport us to the world we think we deserve.
'Spread your wings and fly' they tell you in virtual reality.
No wonder you're on the ground thinking you're defying gravity.

Humanism has become as common as the common cold.
Inflicting people everywhere- young and old.
With the ideology that the end of all being is the happiness of man
When our goal should be to bring glory to the great 'I Am'.
It's teaching that man is the center of all things existing
And the problems man face can be solved by man's fixing.
Well you wanna be happy? Here's something for you:
Happiness is the bi-product of living in Truth.
But you live in a lie, lying around all day lying to yourself
Convinced that your lie is the truth and that it's all about you and about nobody else.
This humanistic thinking has clouded our vision to the point where we believe
That we are at the center of the universe.

But if you studied geography, you would know that you are about
6,380 km away from the center of the earth
And according to physics you are not big enough to have a strong gravitational field so
By that logic, truth is, you really can't be the center of anything other than your ego.
And according to astronomy, the Son is at the center of the solar system
And heavenly bodies can only attract and not repel so you really can't miss Him.
Whether you want Him or not, He is the source of all life.
So you are subconsciously drawn to His warmth without which you will surely die.

I dare you. Open your eyes and look directly at the Son.
You will become blind to the things of this world, but you will see the only One
Who can cure of this disease that you've fallen prey to.
That in your blindness you might see and of your I's make good use.

It took me until recently to realize
Just how much better it is to see through real eyes.
So I made my way down to the Doctor who's better than any expert at Pearl Vision.
He executed the needed procedures with a flawless precision.
He unclouded my vision by removing the cataracts
And patched up my cornea giving me the protection I so lacked.
He added cones to my rods so I could see in full color- red-
That it's not about me but about the blood that was shed.
And even though the image refracted through my lens is inverted
He restored my optic nerve so the image of the cross is not perverted.

Unfortunately, no one really wants to see the eye doctor so they find an imitation.
Spending their time trying on reading glasses when they need a new prescription.
See no one wants to see clearly. They just want to see clear enough.
So they avoid laser eye surgery and merely get by on the fake stuff.

I'm begging. Don't let your eyes keep bothering you. Go see the master Surgeon instead.
He'll replace your iris with service so you can serve Him instead.
Now I know this sounds strange but it's important. Please hear me:
If you just remove your eyes you'll see Him a lot more clearly.
And some of you might not get it, so let me show you what I mean:
If you just remove your I's you'll see Christ a lot more clearly.
